In the language of one of our most elegant poets, "God made the country and man made the town." We have often felt, in walking through cool grovee and by streame fushed and crowded with roces, that no expression describing nature equaled it. In Kentucky, especially, we feel and see he beneficence of the Creator In the way'le has clothed the pastures with greennes and set them in the bowls of shelteringhills. Even our mountain ridges seem shelter and protect the lower lands reer than divide them. No one who has idden through our State, whether from 1st to west or north to south, can blame us r calling it "the garden spot of the worl" even if we say its hills are higher, Its vieys chadier, and its roll-The beauty and veliness of the land has Divine, in the flownd passion of his clo-

ration of its citizens, o matter under sembles a good vine run; seed, is something better, perhaps, the any other barren scrap we could pick nand put ln its place. The same eky fol it in, and it forms a part of the nationaountry, alas! once the most united andlorious upon earth, now the most broken d disunited. There is a prejudice againsthat section growing and gathering forcegainst that the will of the covereign people omposing the several New England States.

This looks like departing widel from the text upon which we began, yet we aresonfident that a little reflection will show the apparent criticism ln all we have wrigh. God made the country and man made he

Was not the poet right? "What's a poet's fate?
"To write a girl a somed,
Aid get a ring,
Ossome such thing,
And fustianize upon R."

Which quotation has flowed into our columns like the flutings of water over pebbles. It rather mars prose, but as it is written, we will let it stand. It ie from one of the teglected poets of America.

The tomment we delicately intended to put on the English poet by his great rival was, in the language of Mr. Snapsby, "Didn't you put too fine a point on it?" tight local, set up by a printer who was take out this spring, one weighing 132 and Or, "no to put too fine a point on it," was told to "foller copy." It was intended for it a fact | Did man make the city and God a notice of the New Memphis theater: make the country, or doesn't the same allpervading influence chadow and protect us

Grafting the Vine.

The Horticulturist for September, just published by the Messrs. Woodward, contains an article giving minute directions for grafting the grape vine. As the season is now not far off, the best time being the month of November, and as the successful grafting of a choice variety on a wellchosen wild stock brings the vine into bearing considerably earlier, and with greater productiveness than if the shoot were reared as a cutting, we transcribe a part of some entirely barren, growing in almost every thicket, which might in this way be turned to account. The writer cantions the cultivator of the

stocks ln which to insert the scions. Ile supposes that certain varieties have a greater affinity to each other, and are The process of manufacture is not long, therefore more likely to succeed as grafte and, notwithstanding the employment than others -- but we regard his experience some most ingenions machines, is not at all Where no mortality, in rude decay, in this respect as rather uncertain. ilere is an account of his method: All the manipulation should be done with are; a pleasant day, when the soil is not where it is brought to a liquid state, and wet, should be selected; the ground should there repeatedly stirred and worked with Dwell in our hearts through all sternity. be removed, so as not to injure the roots; a long iron ladle till the most of the imsharp and suitable tools should be had, to purities have found their way to the top be carried in a basket with the wax, the and have been removed. The mass is then ties, &c; when the vine is nnoovered, saw allowed to cool, and during the cooling is or cut below the joint so as to present a worked by the ladle or poker into lumps, smooth stem that can be easily split, leaving which are taken while yet red-hot to the a clean and smooth place to insert the scion. machinee in which the puddling is com-Let the latter be fresh ont, and shaped and pleted. These can be best understood by fitted with care; the split being made with supposing an immense pair of shears, with a sharp instrument that will cut, not tear, one side stationary and the other working the root. After insertion, fill all the open upon it-the blades of the shears being not and will afford the reader much amuse-

Framlingham church was visited. Here and soldier, the Earl of Surrey, who somewhere between 1516 and 1518, and was ant here, and make the grovee musical one of our earliest improvers of the art of with their melody. They imitate a great

flow Horseshoes are Made by Machin

ery.

The Providence (R. I.) Press has an interesting account of the manufacture of horseshoes by machinery in that city. This with vivid tints by Sol's bright shining given; is a comparatively new branch of industry, How sparking green the grass beneath our feet, involving some enrious processes, and it will be remembered that the Introduction "Tie Sabbath morn, and all the sarth is calm; of the machine-made shoes recently created an excitement among the journeymen horseshoers in that city. The I'ress says:

Perhaps the manufacture of most interest, from its novelty and completenese, the article. There is a vast number of wild is that of horseshoes. In almost no branch grape vines, come of poor quelity, and of business has machinery made a greater And to enhance the grandour of the scene. change in the cost of production and in the perfection of workmanship than in this manufacture of horseshoes. The shoes turned out in this factory are as much superior to the old hand-made shoes as modern cotton fabric ie to the product of the hand- The little birds are singing songs of glee, vine to choose none but perfectly healthy And so much has the introduction of machinery cheapened the process that machine-made shoes can be sold by the tun With visions of the joy beyond the tomb.

in pigs, is first puddled to extract all the mparities left by the melting process. This consists in placing the ir a in a furnace spaces with Trowbridge's grafting wax, to of sharp steel, but of heavy, broad, flat keep the water out of the split, then tie masses of Iron, so arranged that the lump with Cuba bass. Cover the lower bud with of half molten iron, when brought from moss so as to keep it continually damp, the puddling furnace and placed upon the which promotes the callns (drying at eny platform formed by the lower half of these ime destroys the bud); cover with sand, great shears, will be compressed repeatedly in a clay or hard soil (this is necessary to and with the greatest force by the upper secess); then cover the scion with a com- half. The mass of iron is turned in every non flawer-pot and over the whole place direction under the enormous pressure of itter straw or earth to prevent freezing- the upper arm of the machine, till all the r if it freezes, to protect it from extreme remaining dag and other impurities are In this way, the work may be done forced out, and the mass formed into suitan November, while the weather is suitable ble shape to be rolled out into bars. The work ont of doors, and before the ground pressure to which it is subjected is so great that, as the onter layer of the iron is grad- fied with most things, and, above all other he same rule will apply to the work when ually cooled and forms a hard crust, the performed in March, and, so far as the crust le broken, and streams of the molten writer's experience goes, the scions grow metal pour through the cracks and down

These pudding and rolling processes are, o March. If due regard is paid to protect to one unaccustomed to seeing the working a dignified conclusiveness-not to add a hair. ion, the plant may be grafted as well above of iron, the most interesting parts of the grand convenience—in this way of getting ground as below, but it is more trouble- manufacture. The works are run through the entire night, and this is the best time towards establishing Mr Podsnap in his to the root. The writer has had best sucto the root. The writer has had best suc- to see these processes to advantage. The ess when using grafting wax, moss and hage buildings, with roof and rafters half and, and indeed in clay soll has hardly lighted by the lurid glare of huge masses choose to discuss it; I don't admit it !" succeeded otherwise. In some cases he is of molten iron, the workmen with faces now Podenap had even acquired a peculiar aware that he lost scions by having them in darkness and now flushed by the sudden dourish of his right arm in often clearing ent and exposed to the air, being called off and ghastly light of the opened furnaces, the world of its most difficult problems, by when ready to insert them. Care should and the weird and varying light upon the sweeping them behind him (and consetune of cotton left the islands-two tuns scribes the condition of the Territory as be taken to select well-ripened wood for neighboring trees and houses, presents a soene of strange interest which nightly atracts groups of gazers.

The iron, after puddling, is again heated in a formace and taken to the rolling machines, where, by being passed through a succession of rollers each smaller than the perding to his experience, does well on the preceding, it is reduced to bars of the size that important reservation, a mistake, and ing unexpectedly and radiantly be sultable to be at once made into shoes. Besidee the iron which is thus prepared tablishment, great quant

We have ties, designed for the market, are puddled seen the Union Village grape grow with and rolled into bars of about the thickness | Elsewise, the world got up at eight, shaved

The iron prepared for the manufacture of orseshoes is next cut into lengthe, and the at half-past five, and dined at seven, making the grooves and punching the nail holes is done upon the straight bars before their integrity might have been stated they are made into horseshoe shape. The thus: Literature, large print, respectfully unching machines, eight are used, punch the holes in a shoe at close at a quarter we blows, and one machine, tended by a boy, is able to trim off, by a single stroke of a knife, the rough edges left by the punches. a respectable performance (without varia-The bars thus prepared are taken to the horseshoe machines, of which there are six now in operation. In these they are placed npon an iron table, upon which is fixed a sere or dil projecting above the surface of home at half-past ave, and dining at eevthe table, and having its edge so made as en. Nothing else to be permitted to those exactly to fi' the inner cage of a horseshoe. An arm in the shape of a U is then driven forward and forces the bar to bend around where! As a so eminently respectable the core into the exact shape of a shoe. A man, Mr. Podsnap was sensible of its besteam trip-hammer then gives the shoe anumber of heavy blows, between which a under his protection. Consequently he jet of water is driven by the machinery always knew exactly what Providence apon the shoe, and the forging is complete and the shoes ready to be packed and sent might fall short of that mark, but Mr. to market. These machines require the attention of only two or three men each, and in a minute. It is intended to erect, as soon as possible, six additional horseshoe machines, and when this addition is completed the works will be capable of turning nt about twenty tuns of shoes in a day.

About haif that amount ie now made. This manufacture of horse-shoes by chlacry bas grown up within a very hardly thought that shoes could be made by nose, who seemed to take occasional frosty machinery capable of enduring as hard service as those made by hand. But the to shrink back again, evercome by her experiment has succeeded beyond the exestablishment has grown in that time to its | weight of Podsnappery. present enormous proportions, with a coninterest that many of the localities are stant demand for its manufactures beyond

few inches in depth, and manured a little the roots of the young plant will, for the most part, be formed within this stratum of soil that has been stirred by the cultivator. And more than this, the roots will be so nearly in a horizontal direction that a body with the soil, when it freezes and rooms, and In their ewarthy giants of look thaws. We are well satisfied that every farmer, who has light soil of the kind ius correct, with reference to winter grain.

THE MOCKING BIRD .- We see in the Country Gentleman, of July 14th, a communication from Edgar Sanders, of Chicago, etating that a pair of mocking birds have taken up their abode in his garden, and are building see them so far North? Mr. Sanders ls undoubtedly mistaken about their bein the well-known Southern mocking bird as St. Louis. The brown thrush, resembling said, "My man, you do not sweat at that day or two ago, to a dandy, who had more the mocking bird in size and appearance, is a handsome tomb of the illustrious poet has misled Mr. S. They mock and sing was very well, but not equal to the real mocking wagee." born, it was enprosed, at Framlingham, bird. The brown thrush are very abund-

[For the Louisville Sunday Democrat.] A SABBATH PIECE.

Inst tasting dows from out the gobiet sweet. From noise 'tis hushed by that all-healing balm, The voice of God, who did the tempest stay;

The grazing beast seems straying to the shade Of you old tree, so huge, and grandly made, To bathe in dews upon the grass so green

This is His own, His creetures' resting day.

I hear the echo of the church-bell's sound !, As up to Heav'n lu prayerful strain it bounds, To thank the God for all the powers giv'u, And asking still more joys of gracious lieav'n. Too pure and sweetly grand save, Lord, for Thee And to embalm the mind of mortal gloom

Thy works, O Lord, our mortal hearts allure, And sweetly tell of lands where all is purecomplicated. The iron, brought to the yard Comes formed in sinfulness of crumbling clay;

The lands where Subbath morns are far more brigh Than this, and void of Surrow's dreary night-Where real joys of sacred melody ELIZABETH: OWN, KT., May, 1864.

Dickens' New Story.

"Our Mutual Friend," the new cerial of Dickens, is now engaging much attention. The chapters wherein the characters of Mr. Podsnap, his wife, and daughter are and who, wearing for the first time the adevsloped, are quite in the Bozian style, meni. Our extracts are taken from the chapters referred to:

WELL SATISFIED WITH HIMSELF .- Mr. Pod spap was well to do, and stood very high in Mr. I'odenap's opinion. Beginning with good inheritance, he had married a good inheritance, and had thriven exceedingly n the marino insurance way, and was uite satisfied. lie never could make out why everybody was not quite satisfied, and he felt conscious that he set a brilliant social example in being particularly well satishings, with himself.

Thus happily acquainted with his own merit and importance, Mr. Podsnap set-tled that whatever he put behind tered over with diamonds and pear him he put out of existence. There was rid of disagreeables which had done much 'I don't want to know about it; I don't Mr sheer away), with those words and a flushed face. For they affronted him. Mr. Podsnap's world was not a very large world, morally; no, nor even geographiworld, morally; no, nor even geographically; seeing that though his business was this capital. In whatever in sustained upon commerce with other countries, he considered other countries with of their manners and oustoms would con- the Imperial carriage was lighted in clusively observe, "Not English!" when, such a way as to bring her out into with a flourish of the arm and a flush of the face, they were swept away. close at a quarter-past, breakfasted at he is all the more sensitive and en

Nothing else to be-anya ing required of him to take Providence l'odenap was always up to it. was very remarkable (and must have been the shoes are turned out at the rate of eight very comfortable) that what providence meant was invariably what Mr. Podsnap

MISS PODSNAP, THE YOUNG ROCKING lloass.-There was a Miss Podsnap. And this young rocking-horse was being trained in her mother's art of prancing in a stately manner without ever getting on. But the Seven or eight years ago, when the her, and in truth she was but an undersized damsel, with high shoulders, low spirits, considered a doubtful experiment. it was chilled elbows, and a rasped surface of peeps out of childhood into womanhood, and ectations of the original movers, and the head to foot, crushed by the mere deadtion in Mr. Podsuap's mind which he called the young person," may be considered to have been embodied in Miss Podsnap, his daughter. It was an inconvenient and exting institution, as requiring everything in the universe to be filed down and fitted

it bring a blush into the cheek of the young deep, mellow soil, composed mostly of muck person? And the inconvenience of the that I looked hard in another direction Mr. Podsnap, she seemed always liable to soil is now in etubble, the better way will buret into blushee when there was no or-using a double team-to the depth of of demarkation between the young perway to prepare soil than to plow it eight or of drab, white, lilao, and gray were all laming red to this troublesome Bull of a person. The l'odenaps lived in a soil is plowed deep-it being mellow, porous shady angle adjoining Portman Square. and full of vegetable matter-the roots of They were a kind of people certain to dwell in the shade, wherever they dwelt Miss l'odsnap's life had been, arst appearance on this planet, altogether of a shady order; for Mr. l'odenap's young person was likely to get little good out o ociation with other young persons, and had therefore been restricted to companionship with not very congenial older persons, and with massive furniture.

Miss Podsnap's early views of life being principally derived from the reflections of it in her father's boots, and in the walnut they will all rise and cettle back again in and resewood tables of the dim drawinging-glassee, were of a comber cast; and it was not wonderful that now, when she was alluded to, will find this theory reliable and on most days solemnly tooled through the l'ark by the eide of her mother in a great, tall custard-colored photon, she showed above the apron of that vehicle like a dejected young person citting up in bed to take a startled look at thinge in general and very strongly desiring to get her head under the counterpane again.

> While inspecting a farm in a pauperized district an enterprising agriculturist could not help noticing the elow, drawling otions of one of the laborere there, and "seven shillings a week isn't sweating ly asked. "Because they can not see your

"I keep an excellent table," sald a ady, disputing with one of her boarders. 'syntax' means?" you put very little upon it.'

Paris Correspondence Mentreal The Empress Euronie-Her To Diamonds, etc.

Since the splendid days of Le the grandoise palace created by seen no spectacle so brilliant as derful affair of last Saturday, the Empress In honor of Queen

Don Francisquez de Assises, first of his wife, to whom, in spite of the rence with which she regarded him, Phillippe contrived to get the young Queen married by her mother, reached Bo on the 16th, and was magnificently received by the authorities of the region, eacto Paris by persons cent by the Empreached St. Cloud on the 17th; was received the Emperor, Empress and little Project of the Emperor of the Empress and little Project of the Emperor of the Empress and little Project of the Empress and littl with great ceremony, at the foot greatstair-case. Next day hosts and went to the Tulierles, where the King

THE DRAMA IN GERMANY .- Lest We should be suspected of exaggeration, we quote from an accute personal witness the state of the native drama in Germony :

Such men as appear at present in Ger man plays are rarely met with in the world: and when here and there such do make their appearance, the police of the place-if there is any police-takes the charge of them upon itself, and loiges them in bedlam or n work-house.

The characters most frequent on the German stage are frantic lovers, parricides, highwaymen, ministers, mistresses, and men of fashion with their pockets full of daggers and poison, melancholy men of all sorts, and incendiaries and grave-diggers. I could name to you above twenty pieces, the bis brains out if he did not give him money chief characters in which are mad, and where Under this horrible compulsion the father the poet has endeavored to exhibit his forte the display of folly and distraction of mind. I assure you, too, upon my honor, that part of the German public with which have had the honor to be acquainted hitherto, admire, and most violently applaud, those scenes which show the madman in his wiidest transports. There are plays in which the chief character success fully murders from twelve to fifteen people, by way of crowning the meritorious deed, plants a dagger at last in his own Purtecub Kentucky, were buried in the No breast. It is a fact that pieces which have the most madmen and murderers in them meet with the greatest approbation Nay several actors and actresses have complained to me how difficult they found it to invent new ways of dying on the stage It must be difficult, for there are scenes in which the principal performers must remain for half an bour in the last agonies. uttering broken words, and under continued convulsions; and it is certainly no easy task to sustain such a death with pro priety. I have often seen no less than five people at once dying on the German stage one ringing out his knell with his feet, another with his arms, a third with his belly, and a fourth with his head, wh le the pit seemed agonizing with joy, especially if the sport lasted, and clapped each convul-

sive movement. The next in rank on the German stage, after the madmen and murderers, are drunk-ards, soldiers, and watchmen. These characters correspond too much with the national humor not to be welcome to the audience. But why the phlegmatic Germane, who are troubled with so few violent passicus, and delight so little in ilesperate transactions, should take such pleasure in the agger and bowl is not easily accounted

QVING JOT TO A CHILD. - Blessed be the for there is no saying when and where it ery body remember some kind-hearted man who showed him a kindness in the dulcet days of his childhood? The writer of this recollects himself, at this moment, a barefooted lad, standing at the wooden-fence of a poor little garden in his native village, while with longing eyes he gazed on the flowers which were blooming there quietly In the brightness of a Sabbath morning The possessor came forth from his little cottage: he was a wood-cutter by trade, and spent the whole week at work in the woods. He had come into the garden to gather flowers to stick in his coat when he wen lie saw the boy, and breaking off the most beautiful of his carnations-i was streaked with red and white-he gave it to him. Neither the giver nor the receiver spoke a word, and with bounding steps the boy ran home. And now here, at a vart distance from that home, after so many events of so many years, the feeling gratitude which agitated the breast of that boy expresses itself on paper. The carnation has long since faded, but it now blooms

afresh .- [Douglas Jerrold. Washington Irving was once asked about his health. "There is a streak of old age in it," he replied; "what a pity it is when we have grown old we can not turn half of gallone. round and grow young again and die of cutting our teeth."

The most mischievous liars are those who keep sliding on the verge of truth.

This is from an ever welcome contrib-[For the Louisville Sunday Democrat.] AN OLD MAN'S MEMORY.

BY TRUSTES HOPE.

I've been afar in stranger lands, Have sought the wide world o'er, But ne'er have met the gentle hand I loved in days of yors;

That hand once more upon my brow Would fill my life with flowers-That hand whose touch could soothe me now As then, in childhood hours.

Long years have fled eince first I bent My childish knees in prayer-Long years of toil and labor epent-Long hours of cank'ring care; That place beside my mother's knee Where I in childhood grew.

Brings dearer, holler, fonder joys, Its aspirations, too. I've felt the joys that others crave. Have known the sacred tle. But beaming smiles my mother gave

When youthful hopes beat high, Are dearer to my smitten heart Than glory, gold, or fame, And youth again to life will start At that dear cherished name.

One drink from those sweet waters now Sends freehness o'er my life, In which I bathe my furrowed brow Of woory, worldly etrife. Tho' weary life is almost spent, Its echoes come once more-

Bright youthful hopes a moment lent To gild the dark way o'er. My friends, my boyhood's gentle friends, Come crowding round my heart-

A light upon my path descends, And filloth ev'ry part. My youth, my bright, my early youth, Oh, give it back to mel Its many thoughts, its perfect truth,

Its wild sweet melody. My manhood's strength and menhood's power How fast they pass away-

A little span, a single hour, Then nature's swift decay. Will mem'ry still be with me there, Whom a yly death comes on?

Oh, shall I meet the friends of youth Upon that happier morn? Parewell, vain life; Aer gentle klas I feel upon my lipe.

And there are brighter joys that this My spirit longs to sip; My mother greets her weary boy,

From trials, tolls, and pain; And, guided through celestial joys, I am a chiid again. SEPTEMBER 3, 1864.

A NEW METHOD OF TRAVELING .- A tunnel of rather more than a quarter mile in length was lotaly built in the grounds of the Crystal Palece, London, for the purpose of testing a new method of propelling Ramall, the inventor, laid down a short inbe at Battersea, to show, on a small scale, that both passengers and goods can, by the conveyed from place to place. The carciage is blown through the tube by air driven into the tunnel by the revolutions of an enormous disc, and sucked through on the return trip by a large exhausting | Rebel Loss in Field Officers Extramachine, which, as it exhancts the air in the tunnel, enables the ordinary force of alr at the other end, fourteen pounds to the equare inch, to push the train or car up the tunnel. Of the experiments which have been made at the Crystal Palace, the Times

The luxury and comfort of this mode of underground traveling will occasion, perhaps, the greatest surprise to those who may have an opportunity of testing it. The tunnel is dark, it is true, as all tunnels must be, but the carriage is well light ed, and there is no reason why gas should not be employed. There are insuriously oushioped seate placed along each side of the carriage, as in an omnibus. There is a glass door at each end, and lamps are carried in front and behind the carriage, so that the tunnel is really illuminated as the train pastes through. The motion of the carriage in so smooth and easy, there is such a complete absence of vibration, that it is totally unlike traveling upon any existing line, and is more like the motion of a well-made brougham. Add to this that there is no enflocating smell of the sulphur and smoke from the locometive—no escape of steam, no staguant, polluted and conous air to breathe, such as that of the ordinary tunnel. Every train which pas ea through most carry with it its own sup-ply of fresh air, and must drive out before it any foul air. This purity of the at-mosphere is still further secured by a con-stant stream of the external air which passes through openings at the bottom of tunnel, so that the air in every part of the tunnel is as jure and as sweet as in the supshine above ground. Another of the advantages of the avatum is that collisions and casaulties arising from them, are impossible. No two trains can by any con-ceivable possibility be in the tube or tunnel at the same time. The worst that can possibly happen to the traveler is that the rain may be set fast, or unable to move. swing to some accident to the machinery. in the event of such an occurrence the pasengers have simply to open the door at ither end of the corriege and waik out to he nearest month of the tunnel.

RELIGIOUS MADNISS IN GERMANY .- ID the little town of Benn, Pomerania, half dozen people have been saized with a religious madness, in consequence of the presching of a fanstic Protestant clergyman of the place. The following is a sober and unvarnished statement of the event which occurred on the 26th of July, A. D. 1864 -A citizen having called for a vestry

secting to be held on a subject of extrems and urgent importance, a large number of his fellow-parishioners assembled in the burch to discurs and decide apon the cemnunication of their friend and neighbor. the presence of from eight hundred to one thousand persons the latter complained that the Rev. Herr Petri having denounced his house as one visited by the devil-nay, by devile-the fatal denunciation had realzed itself, and there were four of them ear y distinguishable in the four corners if his dwelling. He was very much inconrenlenced by the presence of these uncanny beings. It was a serious thing for a mon live, work and bring up his children under the supervision of demons. They were smail at first, but, growing visibly, became more and more intolerable, and lid him too much damage for him to tilow them to reside within his four walls. le therefore charged the Rev. Herr Petri expel the demons he had so wantonly rought down upon a pious, righteous and elieving Christian, and he asked ble fellowcitizens to support his charge, and compei the cierical gentleman to repair the damage be had inflicted. Beeiden-and here the rue Pomeranian peeped out from the iafatnation of religious ex ravagance—he did not see why his house should be ren lered unimbalicable when he paid rent, and, ndeed, contributed to the public expenditure in the same proportion as his neighbors, who njoyed the protection of the secular and clesizatical authorities.

The assembly then discussed the subject or an hour. It seems, however, that they were already too far gone to administer the right sort of comf rt to the haunted inlividual. At least, it is stated that the neeting broke up without having discovred an efficacious means of sealing the fiendish gueste tack to Pandemonium.

THE SWISS SCIENTIFIC ASSOCIATION -The orty-eighth annual meeting of the Natural Society of Switzerland was held at Zurich last month. It brought a host of Swins naturalists together and was largely stended by men of science from other untries. Among those present were l'roseors Typdail and Lawrence, of London rofessor Cove, of Berlin; Jahn, of Hamurg; Stoppani, from Milae; Vegelsang and Landolt, from Bonn; Dr. Werfsbaught, rom Prague; Zahn from Ameterdam; Hermann von Myer, from Frankfort; Zineken, rom Halle; Professer von Gornp Beasnez, rom Erlangen: the younger Moldenbauser, from Cassel; Ilr. J. Auerlach, from Mosow; Professors Rouseh and Stea-lel, from Tubingen, and othere.

At a general session of the society in the rossreths-Saal, or Town Hall, the address of President Herr was received. A PIG IN THE FENCE.

- Did you never observe, when a pig in the fence Sends forth his most pitiful chout, How all of tils neighbors betake themselves them To punish tim ure he gels omit What a imblub timy raise, so that others afar May know his condition, and hence Come running to join them in adding a scar To the pig that is fast in the fence!
- Well, awine are not all the creatures that be Well, swine are not all the creatures that be
 Who find themselves sticking between
 The rails of the fence, and who sirive to get free,
 While the wor d is still showing them in;
 Who find that the favor they meet with depends
 Not on worth, but on dollars and cents;
 And 'tis indeed few that prove themselves friends
 To the pig that is fast in the fence.

Atlanta an Absurd and Worthless Place From the Richmond Examiner.1

Atlanta was never a strategic point, so gate had long been off its hinges, and is one of those "passages that lead to nothing. Atlanta was a sort of a place which would panies rush with dreadful shricks. As covered. whereas those of Weldon are at the two op-posite sides. Before the war, there was were covered with fresh stains of blood. very little sign of lite in the dreary place, except when trains came in or went out, everybody coming in demanding urgently when he would have an opportunity of gettening to a departing train, for nobody seemed to stay in Atlanta one moment longer than absolute necessity compelled him; insomuch that one can not help sure ing. now the Yankees are there, that they wil few lottery offices. It is true that if any enterprising person, compelled to pass the day there, thought of penetrating some of grassy passages called streets, he the open space containing the railroad shed There was the heart, the lungs, the stomach of Atlanta. There sullen travelers waiting for trains were always stamping about often looking at their watches; gnawing, in their impatience, the ends of their cigars, and uttering maledictions upon the Gate City. Since the war began, indeed, there has been at Atlanta some few factories car ried on upon government account; and surgeons and other non-combatant appur tenances to the rear of an army, have gathered there a kind of floating and fugitive published at Atlanta; thus giving to the mounted their horses and role away.

place that factitious air of importance. In the meantime the stockman pu which has imposed upon many Confederates on themselves in triumphant possession of a branding, &c., there, at which all the was met by one of the mounted troopers, more or less perpetuated in the children who, after exchanging a few words with born to such; the brant of these calamities are all gone. The government factories are stopped, and their weatherboard sheds are stockmen knew every inch of the country for some hundreds of at full speed. The trooper pursued him, billiard tables they may find there; some dusty counters of lottery offices; empty demijohns of long-decerted barrooms; but the track of the robbers' horses.

This they followed for several miles, and they be the track of the robbers' horses.

This they followed for several miles, and they be the product of the bridge o of the Gate City who remain to do the hon- tance, however, did not

impartially Trojan and Tyrian. Now this is presented as a tolerably accurate portrait and history of Atlanta. 4 has no natural advantages whatsoever, either for peace or war. There never was any reason why there should be a town there; it has no river; guards no pass; stands upon a place which has neither strength nor beauty, nor commercial tacilities-save what have been created by the railroads alone. The railroads leading thither being, for the present, lost to us, the

FIGHT BETWEEN TWO GIRLS AT CHURCH. The St. Joseph (Missouri) llorald, of July 29th, tells this story:

On last Sabbath, while church was being held about six miles north of Albany, Gen the place to secure horses with which to en-ter the service under the call of Gen. Fisk. A Union girl promptly came forward and placed her horse at the service of the boys, and also pointed out to them another fine steed, which she remarked was the property of a Secessionist lady friend of here. A traband," and was about to leave with him. when the lady owner made her appearance and protested against giving hlm up.

The Union girl urged the soldier to go aloug; she had voluntarily contributed her applied all sorts of opprobrious epithets to the Union girl, who in turn became angry ground, and then jumped upon her and bounded away at a terrible rate. Dr. Willis, of that vicinity, parted the Amazons, but they didn't stay parted, and were soon fighting each other again, accompanying their blows with screams of defiance Their gay Sunday dresses were soon in shreds; ong, beautiful tresses of hair were mixed blood from dainty noses, etc. fight, formed a circle, and scated themselves to enjoy the exhibition in regular prizesiyle. The combatants fought long and well, until Miss Union seized Miss Sc cesh by the throat, when she fell to the

There is no fiction about this. It actually occurred at the time and place related above, as several of the Gentry boys now here can testify.

There's a hotel-keeper, in Utica, New York, that only charges half price for lovers; and yet the propriet of says he makes more money out of this class of boarders than any other people about the house. "Let a youth," says he, "sit up with a yellow spencer and blue eyes on Sunday night, and he will feel so heavenly, that he wou't get down to pork and beans again till the latte part of the week.

Jeems, my lad," sald a hopeful father to his son, "keep away from the gals. Ven you see one comin', dodge. Just such a criter as that young 'un cleanin' the door. step on t'other side of the street fooled vour poor old dad, Jimmy. Don't cast yer eyes continued for only a few weeks, for there in search of its owner. In a short time that way and wink. If it hadn't been for was a great land sale to be held at Burrows they perceived Gardiner in the paddock: her you and yer dad might a been in Brazil huntin' dimune, my son.

Paper Ships and Paper Guns.

A CURIOUS STORY-IS IT A HOAX?

The London Observer describes a new preparation of paper of a remarkable charman. Do not the silvery drops, chasing each other from the clouds, and falling were explained on the 13th of August, at with their gentle patter on the house-tops the Phanix Works, Battersea, as follows: There were tubes made of paper which thoughts? had been tested in the most satisfactory manner as rocket tubes. Being made of

han theordinary iron tubes, and hey stand the test of rocket firing equally as well as those of metal. Not less remarkable were the thick slabs and boards made of paper, These boards, of one inch in thickness, had been tested by bullet and ball, and the rebullet, which had passed so far through the fie was very weak, and after giving him in all directions, while in the paper board something to revive him, we took a seat by in all directions, while in the paper board round hole. These paper boards are admier advantage, that they are incombustible No amount of heat will set them in a blaze. The application of great heat will produce combustion in the immediate neighborhood pained we were, and how much I wanted to of the flame, but anything like ordinary burning is outle out of the question. In addition, however, to all these good quali-

iles, paper has positively the advantage over timber and iron in the matter of cost. M. Szerlemy, the inventor, well-known sometimes fancy that I can see the the exterior of the Houses of l'arllament, ittle white fence, and my mother and sister has discovered a fiber wich grows in the there watering the flowers I helped them southern portions of Germany, and which may be converted into a rough kind of paper at a cost so trifling as to enable him to out my mother and sister were almost wild compete with the builder of timber and oon as they were a little more reconciled ventor is now engaged in the construction

[From the True Delta.] What I Think of Life.

As I slt beside my window, I am doubly ccupied in listening to the music rain-drops, and in thinking of my fellowand the parched and burning ground, give a strange but peaceful dreamlness to your I love to watch the widening pools, little lakes and miniature islands, about the garden plats, that the swift-falling drops form, and find myself wishing ife had nothing more to dread than such little streams to ford, such little clouds to pass away.

To-day I find my heart keeping time to the ceaseless patter on the window panes, in tender excuses for the frailty of humanity. This great world is very beautifultoo beautiful for us to remember that there are dangers lurking about in the choicest scenes and most lovely spots. And yet experience is our sternest teacher, and limited indeed is that life that has not laid to heart some of her bitter lessons. Afflictions, with icy hands, follow in her train; such afflicion as poverty, sickness, distrust and death. The first, with wan cheeks and sunken eyes, and the frightened cry of hildhood at the sight of "the wolf at the loor;" and darkness peopled with ghosts of of the clock, and the stifled sob. Then the living death of distrust, the night heart, when it shrinks within Itself and preys upon itself, and perishes for want of omething to love and trust. the shadow on the dial-plate of time, when all things seem to panse from their several abors, and go with her to bury her dead.

Oh, if the world would but stretch out her arms, as nature her great lup, as refuge for her children. thing it is to close up the avenues of our dependant one upon the other for the best and choicest of our life-cups. And so ali' for the bitterest. The tongue of sland still unbridled, the figger of scorn as po ed and true to a mark. But civilizati enlightenment and progress are advancing with lightning speed towards perfection; and still there are every day new voices to sing the "Song of the Shirt," new faces to look towards the "Bridge of Sighs." Still the same beaten track to tread, with bruised and bleeding feet, and the same siren voices to tempt, or our own treacherous inclinations to lead astray. Earth has the same quicksands, the same doubts and

trials and misfortunes. And, on the other hand, there is still the ame stern path of duty. There are still essons of great moment to be learned, principles, life giving and noble, to be deeprootey, and still the same opportunities to "be a hero in the strife." scores of our fellow-beings willing to vail our shortoomings, to encourage our weak endeavors, bind up our wounded hearts, and lead us again to the great battlefield of

In this pilgrimage from the cradle to the skies, there is no surer guide or truer friend than Charity, "chief among the blessed there." She casts about the deformed and distorted beings and characters we meet in our life-journey a sweet and holy spell that renders them choice and companionable. She brings to light hidden beanties, and makes us wonder who it is that comes la such a guise of purity and loveliness. She walks the by-ways and desolate spots of earth, and makes them to bloom, and freshens to new life the dying. She gives the cup of cold water to the dried lips, the crust of bread to the perishing body. prays with the distressed, comforts sick, gives holier purposes to the best of ives, and sheds a tear on the corpse of hu-

till up the life-measure with the "small, west courtesies of life," a ready ear to disned for a stranger, and a ready acquiescence in a I that is good and holy and true, and you will find the balance poised so evenly and justly, a fresh charm in all things, and you will marvel at the change. It is so pleasing to have a just appreciation of these little deeds of love. It is, indeed, these very trifles that gives a zest to life and makes us recognize its value. are fathomless in their worth and efficacy They help us to remember, too, that we with them lay up treasures that will tell ln our footsteps when we have passed from earth away, and in eternity, among the chosen of

Simplicity in Apparel.

The Angust number of the Atlantic sionthly has a chapter of 'llouse and Home 'apers," which treats on extravagance in lress and in habits of living, and conludes with the following notice of labors of our dear friends Elizabeth L. mstock, of Michigan, and Rebecca Collins. of New York, who have been engaged in ARY .- Rev. Jonas King, the vetersn mis- religious service in Boston for several weeks

"I will tell you what I saw the other night, girls, in the parlor of one of our ho-tels. Two middle-aged Quaker ladies came have been absent from my country for the gliding in, with calm, cheerful faces, and lustrous, dove-colored silks. By their con absence has never cooled, or in the least versation I found that they belonged to that have been in a position to estimate, better, devote themselves to traveling on missions s nation, enjoy-blessings which God has, soldiers in the country, where they had been if I may say so, lavished upon us-bless- carrying comforts, arranging, advising, and soothing by their cheerful, gentle presence. They were now engaged on another mission to the lost and erring of their own sex they had ventured after midnight into the as the glory of all lands. Here, with one their fatal ways-telling them where the would open to them an asylum, and aid ther.

not help thinking that fashionable bonne' Our fathers, both in the Northand in the flowing lace sleeves, and dresses elabora south, put upon our escutcheon "E Pluribus" by trimmed, could not have improved every continuous and the same of th
